

Genetic Design For Dying

Aiden

Dear mother, I am lost and the damage has been done
Im in love with my old century fix and this needle cant be wrong
But I wonder where do we go from here?
Because were never coming home
The sequel to this nightmare lasts forever, forever So one last goodnight with this painted picture in our minds
The voice inside that sings tonight
So one last goodnight with this painted picture in our minds
The voice inside that sings tonight
Im not scared at all, so lets walk away
Im not scared at all, so now walk away Dear mother, now beyond the grave youre the soul that wants me
Front row with a cigarette, youre the ghost that haunts me
But I wonder, Im too fucked up to come home
I swear this heart was made of stone
I wont pretend that everythings alright when its not So one last goodnight with this painted picture in our minds
The voice inside that sings tonight
So one last goodnight with this painted picture in our minds
The voice inside that sings tonight
Im not scared at all, so lets walk away
Im not scared at all, so now walk away Wake me now, drive faster, make me now a disaster
Take me now, live after and walk away
Wake me now, drive faster, make me now a disaster
Take me now, live after and walk away Can you design living through hell and back again?
Its the life thats killing you, walk away, friend
Can you design living through hell and back again?
Its the life thats killing you, walk away, walk away So one last goodnight with this painted picture in our minds
The voice inside that sings tonight
So one last goodnight with this painted picture in our minds
The voice inside that sings tonight
