Funny

Treble Charger

Save your breath, don't waste your time
I can tell what's on your mind
No need to mention
What we both knowIt's quite a time you picked to tell me
It's quiet time and mostly lonely
And now it's time to save the past
We know so wellIt's not funny
We're not laughing like we did before
And it's not funny
It's just hurting more and moreTake your time to figure out
It's not that plain to see
And if you need
Someone to blameThen you can blame it all on me
It's not the time you picked to tell me
It's more the way you want to show me
And that's all fineIt's not funny
We're not laughing like we did before
And it's not funny
It's just hurting more and moreYou never showed me
You never told me
And all the little things
You meant to say beforeSay what you want, we know that it's true
Yesterday's older now
Seems it's all brand new
And we've never heard it beforeIt's not funny
We're not laughing like we did before
And it's not funny
It's just hurting more and moreYou never showed me
You never told me
And all the little things
You meant to say before
