

# Milky Way

## Bap Kennedy

You must have your wires crossed

I know you think alot

Because I think alot

When I'm not with youBut you'll never see her name next to mine

Written in the milky way like ours is

She couldn't be you if she tried

She couldn't be you if she triedIf I'd have wanted that

I'd have time to go after it

You know I think alot

Because you do tooBut you'll never see her name next to mine

If you were gonna then you would of by now

She couldn't be you if she tried

She couldn't be you if she tried
