

# Home (feat. Richard Caddock)

## Laszlo

A horizon lights up in the palm of my hands  
I reach out to grab the edge  
Was it a reaction to the rainfall  
That made the lights reflect overhead  
Whisper something sweet over the city  
To counter the bitter air  
I will be listening for you  
The chains were too hard to bear  
I believe there's a place  
Where I belong and you do too  
It's not far away  
If only you were true  
I believe that the weights  
Won't take me down when I'm not alone  
I cannot come back this time  
No, I'm not coming home  
Now that I've been long gone  
Have you missed me at all?  
The road home shatters and I feel the pressure  
Of direction taking over me  
If I'm moving through space  
In an endless night  
It's you that set me free  
I believe there's a place  
Where I belong and you do too  
It's not far away  
If only you were true  
I believe that the weights  
Won't take me down when I'm not alone  
I cannot come back this time  
No, I'm not coming home  
It's not far away  
I'm not coming home
