

# Over You

## Dwarves

It's been 10 months since July seven  
You closed the door, I left it open  
Holding out for what might be someday  
so you lingered, I took you with me  
through the country, every city  
Thinking I'd be better off this way

CHORUS:

I guess I don't wanna get over you  
I've tried it a thousand times  
It don't matter what I do  
I guess I don't wanna get over you  
I can't get you off my mind  
I thought it was time you knew

So bittersweet I still remember  
Every part of your phone number  
Tempted, you're just 10 digits away  
I've gotta tell you, go down firing  
leave the darkness, cease the striving  
Knowing that i"ll never be the same

BRIDGE:

It's so hard to let you go  
With all the spaces you still roam  
You're everything in between
