

Everywhere (feat. Martina Topley-Bird) (Mr DJ)

Common

[Chorus:]

How did you know I been waiting for this time to come
And though it tastes like for ever it may not stay long?
Everywhere it's summer [repeat 4X] A shaman since before my birth
And I came down to rock the earth
My mission condition:
I give you, you listen
I'm syncing in time in parallel
In binary, no third return
I'm planning intention
With love the redemption [Chorus] No pop, no pop, no pop, no pop
We gon' do this thang till the sky just drop
Lock into you mind away we rock
In a rocket is the eighty seventh astronaut
Top of the soul, dove and I got in a hole
At the moment they were sayin'
It was outta control
Strap into your mind
Why eyes see some recline
You'll see in time your season to shine
When the stadium is dark
MC's are defined
Get ready, on your mark, put your feet on the line
The race is on, to space beyond
You gon' get there by doin' what you want
Sometimes the most famous feel all alone
So we trip to a place that we call our home
I was known as being spaced and outta my dome
Now I know, it all I've known
