## The Little Things

## **Danny Elfman**

Have you heard the news?

Bad things come in twos

But I never knew

'Bout the little thingsEvery single day

Things get in my way

Someone has to pay

For the little thingsAnd I'm through with the stories

And I'm sick to my shoes

And the walking and the talking

It's got nothing to do with The final solution

It's a box full of tricks

And I'm through with repairs

When there's nothing to fix

When there's nothing to fix

When there's nothing to fix

And it all comes down to youLet the headlines wait

Armies hesitate

I can deal with fate

But not the little thingsArmageddon may

Arrive anyday

I can't get away

From the little thingsWith a pile of cares

And a bucket of tears

I could look at the sunlight

And I feel no fearWith a mountain of maybes

And some Icarus wings

And I'm armed with delusions

And one little thing

And that one little thing

And that one little thing

And it all comes down to youHave you heard the news?

Bad things come in twos

But I never knew

'Bout the little thingsEvery single day

Things get in my way

Someone has to pay

For the little things
