Keep Me Crazy

Chris Wallace

Oh
Oh, oh, oh
Oh, oh, oh
Oh, oh, ohYou were an angel on the run that I caught some how
I tried so hard to figure you out.
But baby you're a pretty little mystery
That makes no sense to meYou got me stayin' up all night, burnin' inside
The voices in my head wont quit
I may be losin' my mind, goin' insane
But I put up with your, ha haAnd it's a wild ride (it's a wild ride)
Every single night (every single night)
Even the worst of times (even the worst of times)
Are the best of timesYou got me singin' Sunday dinner with the bottle of Jack
Drive around town, like a heart attack
Baby your a mess, but it's meant to be 'cause you keep me crazy
Tell me you love me and everything's alright
57 Seconds and you start a fight
Baby some how you're the one I need 'cause you keep me crazy(Keep me crazy)Another little fight
You say you're done
We'll see about that when the mornin' comes
'Cause first you're out then you're right back in
Here we go againAnd it's a wild ride (it's a wild ride)
Every single night (every single night)
Even the worst of times (even the worst of times)
Are the best of timesYou got me singin' Sunday dinner with the bottle of Jack
Drive around town, like a heart attack
Baby your a mess, but it's meant to be 'cause you keep me crazy
Tell me you love me and everything's alright
57 Seconds and you start a fight
Baby some how you're the one I need 'cause you keep me crazy (You got me singin')Oh you keep me crazy
So much that I want more
You're just the lunatic I've been lookin' for (You got me singing)
Oh you keep me crazy so much that I want more
You're just the lunatic I've been lookin' forWere gonna do this right now c'mon
Baby I'm sorry, it's my fault alright
C'mon, it's really, it's really my faultSunday dinner with the bottle of Jack
Drive around town, like a heart attack
Baby your a mess, but it's meant to be
'Cause you keep me crazy

Tell me you love me and everything's alright
57 Seconds for you to start a fight
Baby some how you're the one I need
'Cause you keep me crazy
