Microscope

Goodbye June

Dont wanna hear thats what he said and she said
That kind of garbage rolls on down the hill
Dont wanna know about what he knows and she knows
That kind of work, it dont pay my billsA million dollars couldnt pay the toll
I dropped my hammer and Im down the road
You try to follow me so close behind
Soak up the magic and away I rideTheres a great deal that you dont know
Theres a great depth that you cant go love
Now theres a great deal that you dont know
Under the microscope I will float, I will floatYou got some scruff and its time for shavin
Your hairs too long, better start behavin
You keep on pushin on me night and day
But Ill be risin from that graveA billion dollars couldnt pay the toll
I dropped my hammer and Im down the road
You try to follow me so close behind
Soak up the magic and away I rideTheres a great deal that you dont know
Theres a great depth that you cant go love
Now theres a great deal that you dont know
Under the microscope I will floatI will float, I will float, I will float
I will float, Ill floatI will float, I will float
I will float
I will float
