The Wheel

S O H N

I died a week ago,
There's nothing left
It's caught on video
The very last breath
The very last breath
The very last breath
The very last breath
The very last breathIn time an avalanche
Will cave in on mines
Covering all evidence
The very last time
The very last time
The very last time
The very last time
The very last timeAll this fuss over nothing
Reinventing the wheel
All this searching for something that's not real.
All this fuss over nothing
Reinventing the wheel
All this searching for something that's not real.I died a week ago
There's nothing left
It's caught on video
The very last breathAll this fuss over nothing
Reinventing the wheel
All this searching for something that's not real
All this fuss over nothing
Reinventing the wheel
All this searching for something that's not realAll this fuss over nothing
Reinventing the wheel
All this searching for something that's not real
