

# The Wheel

## SOHN

I died a week ago,  
There's nothing left  
It's caught on video  
The very last breath  
The very last breath  
The very last breath  
The very last breath  
The very last breathIn time an avalanche  
Will cave in on mines  
Covering all evidence  
The very last time  
The very last time  
The very last time  
The very last time  
The very last timeAll this fuss over nothing  
Reinventing the wheel  
All this searching for something that's not real.  
All this fuss over nothing  
Reinventing the wheel  
All this searching for something that's not real.I died a week ago  
There's nothing left  
It's caught on video  
The very last breathAll this fuss over nothing  
Reinventing the wheel  
All this searching for something that's not real  
All this fuss over nothing  
Reinventing the wheel  
All this searching for something that's not realAll this fuss over nothing  
Reinventing the wheel  
All this searching for something that's not real
