

This One's A Cheap Shot

Every Avenue

Biting my tongue just to get me by
Sick of going back and forth with the cheap shots all night
I sink my teeth in a little bit deeper
The red on my teeth should be enough for you Just one more and more, it's never enough
To have me wrapped around your finger
I've got you turning blue
We can't put down our pride When did we think that this would be easy?
We must have been out of our minds
We were holding so tight
It just slipped through our fingers but we won't let go Holding your breath just to pass the time
Don't fill an empty space with the same conversation
I feel your words right behind your kiss
The taste of your lips should be enough But I just want more and more, it's never enough
To have you wrapped around my finger
You've got me turning blue
We can't put down our pride When did we think that this would be easy?
We must have been out of our minds
We were holding so tight
It just slipped through our fingers but we won't let go Waiting for something to tell me
Things are getting better or are they getting better?
Don't put me down, if you're staring at the ground
We're sure to fall, we're sure to fall, we're sure to fall You just want more and more, it's never enough
To have me wrapped around your finger
I've got you turning blue
We can't put down our pride When did we think that this would be easy?
We must have been out of our minds
We were holding so tight
It just slipped through our fingers but we won't let go When did we think that this would be easy?
We must have been out of our minds
We were holding so tight
It just slipped through our fingers but we won't let go
