

Another State Of Mind

Green Day

Well, I'm in another state, another state of mind
I wish that I could be there right next to her
This road leads to this, this one leads to that
Her voice sends shivers down my spine These scars in my flesh
I'm bruised and I'm bloodied
Only she know the pain that I've been through
Talk to her a thousand miles away
There's tears in her eyes If I make it back I'm gonna show her
She's the one for me
Hitch a ride on the wild side
It's real hell on wheels There's gonna be a fight tonight, I know
Another city we can't find
Another city left buried behind
As I picture her, the cities burn away These scars in my flesh
I'm bruised and I'm bloodied
Only she know the pain that I've been through
Talk to her a thousand miles away
There's tears in her eyes
