

What Can You Bring Me

Robert Palmer

When your lovin' is gone
And you can't carry on
What can you bring me
When there ain't nobody else
And you can't help yourself
What can you bring me
What can you bring me Can you bring me that happy day
Let me know that everything is ok
Bring it strong and bring it fast
Bring it till the pain is in the past What can you bring me, that'll unchain me
What can you bring me
What can you bring me baby
What can you bring me Like a man whose on that road
Drivin' hard towards his goal
Like I'm on my last go round
My love life's lost and can't be found
What can you bring me
What can you bring me Hurry baby, don't waste time
I need somebody, help me solve this crime
Bring it strong and bring it fast
Bring it till the pain is in the past What can you bring me, that'll unchain me
What can you bring me
What can you bring me What can you bring me
What can you bring me
What can you bring me Help my equilibrium baby What can you bring me
What can you bring me
What can you bring me What can you bring me
