

# Burn

Alex Lloyd

Watch them motor again  
We can race and will bend  
You might call in the night  
Whos to say whats rightIn the blink of an eye  
All your trace evils die  
Have you seen longer days?  
Tell me, were still awakeAnd if you light your fire  
A little too much  
A little too much, no, no, noYou only wanna go higher  
A little too much  
A little too muchWatch the night time my star  
And look at every distant angel  
Coming round, coming round to mendOh, does your heart fill with joy?  
Every girl and boy  
Having a good time  
Watching the night timeAnd if you light your fire  
A little too much,  
A little too much, no, no, noYou only wanna go higher  
A little too much  
A little too muchAnd were really chasing now  
Yeah, were running down the miles  
Break this tired day, I know the way  
So much for the normal lifeIf you light your fire  
A little too much  
A little too much, no, no, noYou only wanna go higher  
A little too much  
A little too muchWere coming to meet you  
Were coming to get you  
Were coming to help you homeWere coming to get you  
Were coming to meet you  
Were coming to help you home
