

Recently

Dave Matthews Band

Recently I've been
All of content and dreaming I have been
'Cause I been lately seeing
Quite a bit of this woman live on my street
People stare and we just ignore everything
People stare and we just ignore them
And they go away, go away She comes to me
I watch her drink
I watch her comb her hair
Both say that we never before have
Felt as recently People stare and we just ignore
What's the use in hiding out
She says all the time
Let their eyes do the worrying about She and me go to places quiet
Where we are quite alone
Kiss and we hold together
We will be until we done People stare and we just ignore
What's the use in hiding out
She says all the time
Let their eyes do the worring about Both say the we never before
Never before have felt as recently
People stare and we just ignore everything
People stare and we just ignore them
And they go away, go away
