

Let My People Go

1814

There was a man named Moses,
who went into Egypt land
and said to the Pharoah
you better let my people go
cause he was chosen,
chosen to do Jah plan
a sign from above
a miracle for the land

And Moses said, let my people go
thats what he told you to do, oh yeah
he said let my people go
and Moses said, let my people go
thats what he told them
let my people go, he said let my people go

(saxaphone)

The past can not be forgotten, oh no
it happens so that we could learn, yeah
not to repeat the things of yesterday
We gotta stand tall and not run away

And Moses said, let my people go
let my people go, oh yeah
he said let my people go
and Moses said, let my people go
let my people go, let my people go
he said let my people go

-saxaphone solo-

let my people go, let my people go
he said let my people go
and moses said let my people go
let my people go.
