Wildflower

Anturage

I was living in a world without color
Like an old photograph
Flying down the road never looked
At what I might have passed
But when I met you, girl
I just had to slow down
You were beautiful but different
You turned this ol' boy around
You're a wildflower
You caught my eye at the side of the road
You're a wildflower
Girl, that's what makes you so beautiful
I love how your pretty shy smile
Can light up a room
The way that you talk, share your secrets
How your body moves
You got a way about you
That stands out in a crowd
What you think are imperfections
Are what I couldn't live without
You're a wildflower
You caught my eye at the side of the road
You're a wildflower
Girl, that's what makes you so beautiful, yeah, oh
I used to wonder
If love was out there somewhere
With all the millions of people
It was you I saw there
'Cause you're a wildflower
You caught my eye at the side of the road
You're a wildflower
Girl, that's what makes you so beautiful
