Evening Star

Judas Priest

I travelled to a distant shore
I felt I had to go
An inner voice had called me there
But why I did not know
I saw the evening star rise up
Shining out to sea
And now I understand at last what it means
What it all means

Evening star I can see the light
Evening star guiding me so bright

I used to tempt fate
I couldn't see straight
I faltered through my younger days
Never knowing where I was going
Then something helped me penetrate the haze

Evening star I can see the light
Evening star guiding me so bright

Now I am stronger
The haze no longer
Ruins my future destiny
Such inspirations and new sensations
Pull up these string ties chasing me

Evening star I can see the light
Evening star guiding me so bright

I'm home once more, much better for
The things that I have found
Much wiser now, so simple how
Each time I turn around
I see the evening star rise up
Shining out on me
And now I understand at last what it means
What it all means

Evening star I can see the light

Evening star guiding me so bright
