

# Cease Fire

## Sick of It All

I will never yield in my restoration  
Won't look, won't look back though  
I was torn to pieces nothing will destroy my determination  
I won't be suppressed my voice will now be heard  
Cease fire, what did I say  
I didn't mean to blow the world away  
Cease fire, what do you know  
My mouth is like the barrel of a gun  
Cease fire, what did I say, disarm  
(It's time to just disarm) You're too cautious in the new day of this nation  
It's so volatile words can cause an explosion so  
I went to far so I shred up action  
I had no idea the end would come so easy  
Disarm, disarm, we're too far gone, we're too far gone  
Someone please put out the flames  
Yeah, I know it's me to blame  
Arrogance will never pay
