

# It's All Up to You

## Black Flag

Got myself in trouble really burst their bubble my head is going schizo i might embrace or kick you the nights are bright to dim me self-righteous attitudes won't amend me I've tasted life, it sends me only freedom can defend me (no matter what they say no matter what they do it's all up to you) I got myself a cripple... when i stepped outside didn't kick the circle cause it's just a lot of jive I've got my dreams, I won't work for the man whether it's wearing a suit, ...his game plan (no matter what they say no matter what they do it's all up to you) (no matter what they say no matter what they do it's all up to you) I walk downtown where everybody goes leave me alone, I won't step on your toes I've got my plans, and they don't include walking down the street in anybody else's shoes Got myself in trouble really burst their bubble my head is going schizo i might embrace or kick you the nights are bright to dim me self-righteous attitudes won't amend me I've tasted life, it sends me only freedom can defend me (no matter what they say no matter what they do it's all up to you)
