

# My Imagination

## KS FRENCH

when you appeared in my imagination  
i had no idea that you would ever be real  
now you're my life  
not just some fascination  
and i love you now that you're real  
now that you're real  
not my imagination  
someone to love and i do love you dear  
long before love you were here in my memories  
and i love you now that you're here  
and now my dream talks to me  
and fixes my coffee in the morning  
rubs my back when i'm weary, thank you dear  
i love you now that you're here
