

Secret Lives

Electric Light Orchestra

I don't know, I don't know what's on your mind
I thought everything was fine, but it was my surprise
I don't know, I don't know what's going on
Something surely must be wrong, you're living secret livesLiving secret lives, secret lives
And I wonder where she goes to in the night in secret livesWish I knew, wish I knew where I fit in
Wish that I knew everything about your secret lives
If it means, if it means that much to you
I don't want to stop the things you do, I don't need alibisLiving secret lives, secret lives
And I wonder where she goes to in the night in secret livesI don't care, I don't care what goes on there
As long as one day I can share, share your secret lives, yeahLiving secret lives, secret lives
And I wonder where she goes to in the night in secret livesLives, living secret lives
And I wonder where she goes to in the night in secret livesSecret lives, secret lives
And I wonder where she goes to in the night in secret livesSecret lives, secret lives, secret lives
Secret lives, secret lives, secret lives
