

# To Walk The Night

## Samhain

To walk the night  
To feel no love  
To know the touch of another kiss  
Never more  
To walk the night  
To forever roam  
To escape inside cool darkness  
Alone I have wandered my whole life long  
The night becomes my bride and everything else must die  
World without end  
For me  
Unearthly night  
World you fear  
Love lies lurking, a wounded dingo-dog  
Soon to decease I have wandered my whole life long  
The night becomes my bride and everything else must die  
World without end  
For me  
To walk the night  
Solitary friend  
Night ethereal  
World without end  
Forever more  
Forever
