Independence Day

U.D.O.

One electrified eye
Freezing metalized smile
No more cheating the code
The scene is set - emotions disconnected

Welcome to the cyber trail
Laser cops and sirens wail
Held down with magnetic force
Said: come with us - you broke the law

Obey the rules - don't do no wrong
A thought too loud - and crime is done
No appeal for the common man
Just cold hard facts - in computer land

All freedom burns on eternal fire
There's no more independence day
Forever gone never have another
No other independence day

Cyborg arms put the straps around
One more second 'till the switch comes down
Flaching lights - a cage of steel
Turns my head into a dead dogs meal

In this world - robotic rage
You'll understand the acid pain
Do no right - you won't last long
Remote controlled - under the heel of submission

All freedom burns on eternal fire
There's no more independence day
Forever gone never have another
No other independence day

No remorse - for human kind
No recourse - to keep your mind
It's too late - there's no escape
Is this the end of the line

All freedom burns on eternal fire
There's no more independence day
Forever gone never have another
No other independence day

All freedom burns on eternal fire
There's no more independence day
Forever gone never have another
No other independence day

No use for humanity
We'll never ever be free again
No tomorrows
Zero - the number of the year
Zero - the number of the year
