

Good Good

Chillis

Uh, uh when you hear it knockin like that
Y'all know what this is When my man leave the house
I know hes coming right back
I got that good good
I got that good good No matter how much he might try to act
He know just where its at
I got that good good
I got that good good I put it on him right, I do it every night
I leave him sittin', mouth open like
So I dont worry 'bout, nobody takin' my
'Cause I know just the right thang to do
I got that good good I ain't never had a problem keepin' one
Never been worried about him ever cheating on me
'Cause when I say I got that pop lock and drop it, believe me
If Im with you its gonna kill you on the days you dont see me See the things I possess a lot of women dont
And the things Imma do for my, most won't
I hear him talking 'bout it when Im up in the salon
Crying 'cause their man ain't come home
I try to tell 'em When my man leave the house
I know hes coming right back
I got that good good
I got that good good No matter how much he might try to act
He know just where its at
I got that good good
I got that good good I put it on him right, I do it every night
I leave him sittin', mouth open like
So I dont worry 'bout, nobody takin' my
'Cause I know just the right thang to do
I got that good good Ladies dont believe half what you hear
'Cause it's all a waste of time
If you know you got that good good good
Everything will be just fine So let your man be the man when he in public
Even though behind the scenes y'all be runnin'
Let him run with his boys, let him play his little games
Let him drive his Cadillac, dont worry he'll be back When my man leave the house
I know hes coming right back
I got that good good
I got that good good No matter how much he might try to act
He know just where its at

I got that good good
I got that good good I put it on him right, I do it every night
I leave him sittin', mouth open like
So I dont worry 'bout, nobody takin' my
'Cause I know just the right thang to do
I got that good good If you got that good good
And you know it ladies show 'em where it's at?
(Right here)
Where it's at
(Right here) If you got that good good
And you know it ladies show 'em where it's at
(Right here)
Where it's at
(Right here) See I dont know what them other girls be doing
They be crying 'bout they man 'cause they always losing
You need that
(Good good)
Gotta have that
(Good good)
To keep 'em
(Good good)
They need that
(Good good) When my man leave the house
I know hes coming right back
I got that good good
I got that good good No matter how much he might try to act
He know just where its at
I got that good good
I got that good good I put it on him right, I do it every night
I leave him sittin', mouth open like
So I dont worry 'bout, nobody takin' my
'Cause I know just the right thang to do
I got that good good When my man leave the house
I know hes coming right back
I got that good good
I got that good good No matter how much he might try to act
He know just where its at
I got that good good
I got that good good I put it on him right, I do it every night
I leave him sittin', mouth open like 'woo!'
So I dont worry 'bout, nobody takin' my
'Cause I know just the right thang to do
I got that good good
