That's What You Told Me

5ive

That's what you told me baby
That's what you told me baby
That's what you told me baby
You drive me crazyI thought I was the one
When we were together
You would take me to
Another place and time that I could feel free
You were all that I was searching forThat's just when I
I thought I could lean on you for life
I thought that the sun would always shine
But you took my dreams away
I remember the lies that you told me babyOne, you told me you love me you need me
Two, you told me you never deceive me
Three, you told me you'd always be true
Four, you told me we're through, that's what you told me
That's what you told me baby
That's what you told meTell me was it fun taking my love for granted
Now I'm not the one
Everything we used to share has up and gone
I won't need to tell you, you were wrongThat's just when I
I thought I could lean on you for life
I thought that the sun would always shine
But you took my dreams away
I remember the lies that you told me babyThat's what you told me baby
That's what you told me baby
That's what you told me baby
You drive me crazy
You drive me crazyThat's what you told me, girl tell me no lie
Do you want to fly super high, super dooper high no
Mistakes when I'm with you
Know exactly what I want to do
Lay you down and pursue meI'm super fly, 'cause I'm super high
When I'm by your side if you like girl, tell me if you likeOne, if you want to
Two, if you're gonna
Three, time to Jive
Four, five bring it liveThat's what you told me baby
That's what you told me baby
That's what you told me baby
You drive me crazy

You drive me crazy
