

Stray Dogs

Good Charlotte

Three stops, it was not enough
Two hearts that were broken up
One spark and we got together
Three nights that we spent alone
Two days I couldn't stay away
One life that we can spend together I can feel you start to pull away
When I'm going insane Baby have I gone too far now?
I shouldn't let the words come out
I'm giving you the same old speech again
Like they do on CNN
The ticker goes across the screen
And you're just sitting next to me
And now I'm left covering my mouth
You're just walking out
Don't leave me stray, I'm just a dog without you
Don't leave me stray, I'm just a dog without you
Hey, I'm just a dog without you
I'm just a dog without you My car where I sat alone
I called but you weren't at home
I'll try to keep it together
We said there was little time
We said it was low or high
We swore for the worst or better I can feel you start to pull away
When I'm going insane Baby have I gone too far now?
I shouldn't let the words come out
I'm giving you the same old speech again
Like they do on CNN
The ticker goes across the screen
And you're just sitting next to me
And now I'm left covering my mouth
You're just walking out
Don't leave me stray, I'm just a dog without you
Don't leave me stray, I'm just a dog without you
Hey, I'm just a dog without you
Hey, I'm just a dog without you Here I go, on my own
Just another stray you know
If a dog is who I am
I hope you never let me go
Here I go, on my own

Just another stray you know
If a dog is who I am
I hope you never let me goBaby have I gone too far now?
I shouldn't let the words come out
I'm giving you the same old speech again
Like they do on CNN
The ticker goes across the screen
And you're just sitting next to me
And now I'm left covering my mouth
You're just walking out
Don't leave me stray, I'm just a dog without you
Don't leave me stray, I'm just a dog without you
Hey, I'm just a dog without you
Hey, I'm just a dog without youI'm just a dog without you
