Out Of The Blue

Aly & Aj

When something's pure How can people just say, we're not meant to be And when something's true How can people just keep me away from you Suddenly I'm all alone Pushed away for nothing wrong Don't you have the guts to say how you feel about me? Out of the blue They said we couldn't be together I have to get over you We're given no choice, we have no voice Out of the blue Can't even call on the telephone Don't even know if you're at home But to control just how we feel Between you and I, not for one to steal Suddenly I'm all alone Pushed away for nothing wrong Don't you have the guts to say how you feel about me Out of the blue They said we couldn't be together I have to get over you We're given no choice, we have no voice Just wanna hear what you've got to say Are you feeling the same, 'cause I'm not okay Thought when we met, there was something more But the others say, no, they shut the door Out of the blue They said we couldn't be together I have to get over you We're given no choice, we have no voice Out of the blue You knew we should have been together Don't wanna get over you Love makes a choice, it has a voice Out of the blue
