Liberty Bells

Guttural Riot

There's blood in the water tensions only getting hotter better pray to your holy father cause no one can help you now it's right verse left and left verse right everybody everybody fight fight fight!

Fight fight fight revolution fight fight fight revolution they'll take your guns they'll take your rights they'll take your fucking life!

Both sides wanna blame each other people killing one another no ones safe in the country of decay middle class shrinking with the quickness governments sugar coats the madness the biggest always falls the fastest

Fight fight fight revolution fight fight fight revolution they'll take your guns they'll take your rights they'll take your fucking life!

Gun control what a joke cause if you tread on me you will get smoked there's no peace in a violent society wanna make a difference while your looting and rioting

Pushing us into a police state dying to the sounds of the Liberty bells Americas dead so close the casket dying to the sounds of the Liberty bells
