

Heartbreak Radio

Molly Hatchet

Hometown sweethearts who ran in the dark
Only made a move or two
I was just a young fool, never been to night school
Didn't know enough to be cool So she found another lover, they went undercover
When she stole my heart from the ground
Only to keep the peace, calling out the police
Finding me 'fore I lose my mind Woman I love, done gone and left me alone
She got a big fat record for the heartbreak radio A complete investigation, what's her destination?
Did she leave a trace at all
Cover on suspicion, look at my condition
She left me here to take the fall The group said she would play rough
She ought to be in handcuffs, needs to wear a ball and chain
[Incomprehensible]
She know how to play the game Woman I love, done gone and left me alone
She got a big fat record for the heartbreak radio Oh, mama come home
Can you tell me, can you tell me now
Baby, I mean I need you Lonely heart in distress
Sending out an SOS, all across the USA, babe
Come on back and serve your time
Right here here in this hall of mine, got to have you home today
FBI, CIA help me, help me please The woman I love, done gone and left me alone
She got a big fat record for the heartbreak radio, don't you know?
I said, the woman I love, she done, left me alone
She got a big fat record for the heartbreak radio I said, the woman I love she done, left me alone
She got a big fat record for the radio
