

# Kepler 62

[Sam Cohen](#)

The moonlight skips  
Right over your back on a night trip  
The suns rise and other skys, they howl at other moons  
Strange neighbors as you know  
They come and go  
They live in a world without you  
The sun seems closer now  
And look what life has done  
Another storm is spinning promises  
Off in the distance  
Strange neighbors as you know  
They come and go  
They live in a world without you  
A clearer day has never happened  
Looking through the sky like glass  
A Billion would be lovers  
Sit beside you running for a brother  
Strange neighbors as you know  
They come and go  
They live in a world without you  
We're not  
Going back  
To see our lost days  
To see what might have been  
Let the new loves in  
It was fun to intend  
Let the world in  
It only starts again  
Without you  
I barely even know this world
