Why I Came to California

Leon Ware

Zuma
oh I'd like to walk the beach on Zuma
watching all those pretty girls
Venice
it gets really strange going through Venice
there's a different attitude

on a many a summer evening
found me searching for the fire
the elusive sea of childhood
then became a one desire

there were places in the valley
where they said that I could find it
there were rhythms in the distance
in the ancient elder forest

that is why I came to California
it's the strangest groove that I have ever known
all the youth seekers come to California
following the fountain in their mind

San Francisco
catch a cable car to where your dreams go
there's a lot of make believe
San Diego
from LA you'll find out where your dreams flow

from the hillside to the desert
following the map inside me
I can the feel the road is leading
to the treasure that will guide me
there were places in the valley
where they said that I could find it
there were rhythms in the distance
in the ancient elder forest

that is why I came to California
it's the freest groove that I have ever known
all the youth seekers come to Caliornia

following the fountain in their mind, in their mind

Zuma
oh I'd like to walk the beach on Zuma
watching all those pretty girls
Venice
it gets really strange going through Venice
there's a different attitude

that is why I came to California (California)
it's the purest groove that I have ever known
all the youth seekers come to Caliornia
following the fountain in their mind

that is why I came to California (California)
it's the strangest groove that I have ever known (California)
all the youth seekers come to California
following the fountain in their mind
