

# Fat Lip

## Music Box Mania

I can't believe it, it happens each day  
It's ill conceived, just throw it away  
To watch the waitin' time slippin' away  
It won't be long nowI hold the moment, the hour is sublime  
It's hard believin', dancin' with time  
To watch the waiting time slippin' away  
It won't be long nowDown at the landing when the boats come in  
People stand in line  
Close by the water where the fishes swim  
Round and round to pass the timeBut you know it's gonna get there  
Around and around it's gonna spinOut at the airport where the planes come in  
People buzzin' like flies  
Out at the airport where the planes come in  
See the hours go flashin' byBut you know it's gonna get there  
Around and around it's gonna spinDown at the station where the trains come in  
Never make it on time  
Down at the station where the trains come in  
See my friends all walk the lineBut you know they're gonna get there  
Around and around they're gonna spinView it all with suspicion, view it all and despise  
View it all with suspicion, view it all with my eyes
