Someone

Simple Minds

Ruby says, "She does not dream" She says, "She's seen it all before" Outside the night is cold and wet

And we don't know if we can take much moreIs there someone, someone? She says, "Someone is calling Someone is calling for me"

She says, "I got some feelings so different No one else can see"

She says, she saysStreets are empty every day

No longer can you see the sun

You're running home before the morning light

There is a new age that has just begunIs there someone, someone? She says, "Someone is calling Someone is calling for me"

She says, "I got some feelings so distant

No one else can see"

She says, she saysShe says, "Someone is calling

Someone is calling for me"

She says, "I got some feelings so distant

No one else can see"

She says, she says she says
