

# Spiders

## Moby

We just had to ask  
Maybe some one out of Heaven  
Would hear us down here  
We couldn't bear to stand  
How the people leave us waiting  
For something up there  
Oh, why did you leave?  
And why won't you come?  
And save us again?  
Come back to us spiders  
Come uncrush my hand  
Let peace and beauty reign  
And bring us love again, like you can  
We just didn't know  
Someone there outside in Heaven  
Heard us down here  
We couldn't stand it here  
How the people leave us longing  
For something up there  
Oh, why did you leave?  
And why won't you come?  
And save us again?  
Come back to us spiders  
Come uncrush my hands  
Let peace and beauty reign  
And bring us love again, like you can  
Come back to us spiders  
Come uncrush my hands  
Let peace and beauty reign  
And bring us love again, like you can  
So much time, we need to ask everything  
How did it go  
You need it I got it  
Come back to us spiders  
Come uncrush my hands  
Let peace and beauty reign  
And bring us love again, like you can  
Come back to us spiders  
Come uncrush my hands

Let peace and beauty reign  
And bring us love again, like you can  
Like you can
