

Long Way Down

Keyshia Cole

Baby, baby, baby, baby
Baby, it's a long, long, long, long, long way down
Baby, it's a long, long, long, long, long way down
Baby, it's a long, long, long, long, long way down
Baby, it's a long, long, long, long, long way down I'm young but I can't add the tracks of my tears from crying
Broken hearts develop a fear of flying
I pray somebody take me higher
I've already fell for a liar
Can't make the same mistake twice
Then on a lonely night Just when I said that I was through with love
There he was telling me he saw my SOS
That's when I said that I was saving myself for true love
From above and before I let you hurt me like the rest, boy Don't show me how you kiss or where the angels live
You know it's a long way down from there
Just to call it quits 'cause that ain't what love is
You know it's a long way down from there Baby, it's a long, long, long, long, long way down
(Far from Heaven)
Baby, it's a long, long, long, long, long way down
(Far from Heaven) Already had me a cheater and mistreater
Already been with a flosser and smooth talker
I've had a betrayer something like a player
But that ain't what I want no more
(What you looking for?) Get my loving don't date me for your reputation
If you ain't made a decision not to keep it pimping,
(No)
Keep it moving, don't even waste your time
'Cause I don't want you wasting mine When I said that I was through with love
There he was telling me he saw my SOS
That's when I said that I was saving myself for true love
From above but before I let you hurt me like the rest, boy Don't show me how you kiss or where the angels live
You know it's a long way down from there
Just to call it quits 'cause that ain't what love is
You know it's a long way down from there Baby, it's a long, long, long, long, long way down
(Far from Heaven)
Baby, it's a long, long, long, long, long way down
(Far from Heaven) I know, sometimes you don't know
The one before you be the right one
But I know you're the right one for me
And if you know I'm the right one for you Baby slow jam, throw your hands up

And let's dance don't wait any longer
(Don't wait, don't wait)
But if it ain't real Don't show me how you kiss or where the angels live
You know it's a long way down from there
Just to call it quits 'cause that ain't what love is
You know it's a long way down from there Baby, it's a long, long, long, long, long way down
(Far from Heaven)
So, baby, it's a long, long, long, long, long way down
(I don't wanna hurt no more) You know it's a long way down from there
You know it's a long way down from there
Long way down
Long way down
