

# G#

## Kitten

If you want to heal me  
Then heaven only knows  
If you want to hold me tight  
I know where to go

And if you want protection  
From the enemy inside  
To pull you from the ashes (of)  
She'll be heavy when it dies

These are the days  
Through teardrops and haze  
Science erased  
We'll see you all  
We'll see you all  
Again

Spiders on my window  
Take away the time  
And if you are the engine  
Make it mine

And when you need protection  
From a bullet or a ghost  
I'll kill the memory of shadows  
And we can hold it close

These are the days  
(and on, and on)  
Through teardrops and haze  
(and on, and on)  
From violence to grace  
(and on, and on)

We'll see you all  
We'll see you all (again)  
We'll see you all  
We'll see you all (again)  
So kiss this world goodbye  
The picture's black and white

(no, not again)  
You're perfect in the light  
Say goodnight

These are the days  
(and on, and on)  
Through teardrops and haze  
(and on, and on)  
From violence to grace  
(and on, and on)

We'll see you all  
We'll see you all (again)  
We'll see you all  
We'll see you all (again)
