

Them

Little Green Cars

Please say you're not alone
Because that just wouldn't be right
To leave a girl like you
Alone in a town at night
The men aren't safe around here
They spit and shout and fight
It's quiet back at my house
And you can spend the night But when I'm with my friends
I can be as sick as them
But if it's sickness that has my friends
Well it won't be long till we're all dead from it So if you think of me
The way I think of you
Then you must love me
And this love must be true
And yeah I like fucking with my head
Because sometimes I like to feel
The things I make are fake
But they're better than what's real But when I'm with my friends
I can be as sick as them
But if it's sickness that has my friends
Well it won't be long till we're all dead from it So if you love me
For how I see myself
You must be crazy
Or I look like someone else
