

# Everything & More

## Krezip

When the achin' is over  
I hope we can talk again  
I hope that you'll understand me  
I wonder if I ever will, yeah I'm now searching for a better way  
Somethin' that makes me feel good about myself, yeah  
I hope some day, we'll laugh about it all and then  
Everything turns out to be alright, yeah I wish, I could tell you all  
I hope that we'll both be wise, hey baby  
Just wish it wouldn't give this pain  
And that it wasn't my fault, no And that I could help you out  
( 'Cause you still remember)  
Baby  
(That I could help you out)  
'Cause I still remember everythin' The clock's still ticking your heart's  
Still beating so there probably will be love again  
I can feel the aching don't care for what reason  
But I'd rather see you smilin' I'm searching for a better way  
Somethin' that makes me feel good about myself, yeah  
I hope some day, we'll laugh about it all and then  
Everything turns out to be alright, yeah I wish, I could tell you all  
I hope that we'll both be wise, hey baby  
Just wish it wouldn't give this pain  
And that it wasn't my fault, no And that I could help you out  
( 'Cause you still remember)  
Baby  
(That I could help you out)  
'Cause I still remember everythin' Just everything and more, we were  
For everything and more we were  
No way Baby, you're not the only one that gives a damn  
There are too many reasons for me to understand  
But it takes us, baby further way  
To start out as two, baby yeah I wish, I could tell you all  
I hope that we'll both be wise, both be wise, hey baby  
And I just wish it wouldn't give this pain  
And that it wasn't my fault, no That I could help you out  
( 'Cause you still remember)  
Baby  
(That I could help you out)  
'Cause I still remember everythin' That I could help you out

('Cause you still remember)  
Hey baby  
(That I could help you out)  
'Cause I still remember everythin' Just everything and more, we were  
For everything and more we were
