

# I Fly

## CSS

Last night I turned into a fly  
I got through your window and I landed in your eye  
You were sleeping, you didn't mind  
So I flew further down inside your opened mouth  
Down your throat, I tickled around  
And then you cough me out, oh yeah you cough me out  
I hid behind the curtains till you fell asleep again  
I just hope you understand, I just wanna be your friend  
Out on the street, inside a rubbish bin  
Or a garbage can depends on where you live  
Oh, I live nowhere, now I'm a fly  
I fly around, I-I-I fly around  
And you will see me, hanging around  
Outside your flat, inside your car  
Behind the chair, well everywhere  
I'll be everywhere you are just to let you know  
I've been watching you around, you really oughta know  
I fly around, I-I-I fly around  
I fly around, I-I-I fly around  
I fly around, I-I-I fly around  
I fly around, I fly around, I fly around  
I fly around, I fly around  
Last night I turned into a fly  
I got through your window and I landed in your eye  
You were sleeping, you didn't mind  
So I flew further down inside your opened mouth  
Down your throat, I tickled around  
And then you cough me out, oh yeah you cough me out  
I hid behind the curtains till you fell asleep again  
I just hope you understand, I just wanna be your friend
