

Stars

Jus Jack

Looking up to see the stars
Thinking of you, what we've been through, you're not that far
Reach for you
I wish you were the one
So you can see the things I feel with every touch
Of you

But how can I reach you
How can I reach you
How can I reach you
With my hands up to the stars
With my hands up to the stars
With my hands up

Looking everywhere for you
I look up high to see you fly, it won't take long
To reach for you
The time has come for us to part
And find a place for us to stay where we belong
With you

But how can I reach you
How can I reach you
How can I reach you
With my hands up to the stars
With my hands up to the stars
With my hands up

But how can I reach you
How can I reach you
How can I reach you
With my hands up to the stars
