Golden Dawn

Goat

One golden dawn
One summer night
With nothing left to sayWe let the dream begin
It was carried on the wind
And it wandered awayOne golden sky
One spark of light
Forever will remainAnd the song of the storm
Brought us close, kept us warm
All alone making love
In the rainGone is the world outside
Home on the turning tide
True love will find the sun
And know the reason whyYou make me hunger for
You whispered, "Mi amor"
Over the ocean's roar
And the night will become
Our golden dawnTwo hearts as one
No tears to cry
With you I have it allIf love can never die
I'm not afraid to fly
But how far must I fallOne silver song
One lullaby
For all the love we makeIt's the look in your eyes
It's the moon on the rise
It's the sound of the heart
That you breakGone is the dark of night
Call on the early glow
Send down the birds of love
That circle us belowAnd still I will hunger for
You whispering, "Mi amor"
Over the ocean's roar
And your arms reach for meAnd the shine on the sea
And the night will become
Our golden dawn
