Maybe Tonight

Nestor Torres

We've been friends for a long, long time
And you had your lover and I had mine
One night I looked at you and I think we both knew
Some night I'd hold you in my armsMaybe tonight we'll find each other
Maybe tonight you'll turn around and I'll be there
If the timing is right we could finally get together
We might just fall in love and it may be tonightTwo hearts on fire can't live like this
A burning desire we can't resist
Who's gonna break the ice, who's gonna roll the dice
All it would take is just one kissMaybe tonight we'll find each other
Maybe tonight you'll turn around and I'll be there
If the timing is right we could finally get together
We might just fall in love and it may be tonightMaybe tonight we'll find each other
Maybe tonight you'll turn around and I'll be there
If the timing is right we could finally get together
We might just fall in love and it may be tonightMaybe tonight we'll find each other
Maybe tonight you'll turn around and I'll be there
If the timing is right we could finally get together
We might just fall in love and it may be tonight
We might just fall in love and it may be tonight
