

# So

## Built to Spill

Where where did you go  
Why did you leave  
What did you know  
How how does it feel  
When you're the one  
Who is alone  
Someone somewhere somehow said so

Up up every night  
Down in my room  
Out of my mind  
Lost lost in the light  
Looking for you I found  
Nothing, nowhere, no one

If nobody came to the door  
Then why would you open the door  
If nobody came to the door  
Then why would you open the door

If you through a party in everyone's snot  
Would you open the door  
And if you got in your but the windows were stars  
Would you open the door

Where where did you go  
Why did you leave  
What did you know  
How how does it feel  
When you're alone
