

# Will Do

## TV on the Radio

It might be impractical  
To seek out a new romance  
We won't know the actual  
If we never take the chance I'd like to collapse with you  
And ease you against this song  
I think we're compatible  
I see that you think I'm wrong But anytime will do, my love, anytime will do  
No choice of words will break me from this groove  
Anytime will do, my love, anytime will do  
What choice of words will take me back to you? Your love makes a fool of you  
You can't seem to understand  
A heart doesn't play by rules  
And love has its own demands But I'll be there to take care of you  
If ever you should decide  
That you don't want to waste your life  
In the middle of a lovesick lullaby But anytime will do, my love, anytime will do  
No choice of words will break me from this groove  
Anytime will do, my love, anytime will do  
The choicest words will take me back to you Oh my reddest rose, caldera, set it off  
How your fire grows, hermosa caldera  
Glistening through your fused blows  
Careen your caldera, set it off As your body flows, the second hand flashes  
Passes over your skin like time  
My love, anytime will do, my love  
Anytime will do, my love Anytime will do, my love  
Anytime will do  
No choice of words will break me from this groove  
Anytime will do  
No choice of words will break me from this groove Anytime will do  
No choice of words will break me from this groove  
Anytime will do  
What choice of words will take me back to you?
