

Am I High

N*E*R*D

La la la la

Listen

La la la

Hey

Didn't you know I can help or hurt you

So there's no reason to lie

I bet you let those other niggas jerk you

Convince you that they are fly

I never said I was an angel

Said but I ain't like those other guys

Listen

You're convinced that our experience rearranged you

Well maybe you should reexamine

How you tried

Or

Am I high? [3x]

I think I've loved you since our high school

But you only wanted friends of mine

So when they replied

Her she's cool

Only then you gave our friendship time

You won't say it but you think I'm changing

Is it because the whole world calls me drugs

Didn't I say I can help or hurt you

You should be paranoid without me

And with me feel a buzz

Is that cocky or what

Or

Am I high? [3x]

It's the kinda high that got me leaning

One hundred and twenty speeding in the rain

Meaning of a hydroplane

Play both sides of the field

See I know pain

Keep 'em high like Kurt Cobain

Listen

I'm known for speaking my mind
Known for fleeing from the scene of a crime
Eyes redder than the beam of my nine
Eyes redder than the scene of that crime
All for the love of the lime
I'm so high

Insinuating you're not that way
I see how you look and use your eyes
But when I ask you can I jump in
Then you start again with the lines
But if I dare you you'd blow a kiss to another
Though my friends have no idea who you could be
Don't worry I would never tell another
But I ate your pussy as you laid there beside her yes she was asleep

Am I high? [3x]

Why am I sitting here
Peering the sky
Is there something inside of me or am I high
From when we talk on the phone 'til when we fuck
This sounds like deep lust to me
But I get high on your love

Am I high?
