## **Dropout**

## **Motion Drive**

What's the matter with you, you've been down all day? What happened to you to make you feel that way? Baby, ain't that a shame when they call you those names Dropping out from school, guess, it wasn't so cool Everyone, everyone needs some space to breathe All the time we have been blind, so blind, yeah We just couldn't see it, yeah, you're too old to cry, too young to die What happens in the in between? Don't you think it's strange? Things just change, it's just a burnt out town a burnt out scene You've been a dropout ever since you've been seventeen Lonely child when will you see? You need to be free Often times people they find, they're not blind Yeah, they just don't see lonely child listen to me It's just a burnt out town, it's just a one horse scene Gotta get away, gotta get away, you got to Hanging out in the parking lot at dairy queen You've been a dropout ever since you've been seventeen Gotta get away, gotta get away, you got to
