

# Black and Blue

Lou Rawls

There are no stars tonight  
There are no words to say  
I feel my soul losing you  
Where did the good times go  
    Baby what can we do  
        Color our love  
        Black and blue  
        Black and blue  
When our hearts were young  
    Clinging to each other  
    Moonlight used to glow  
When our hearts were young  
    Then there was no other  
        Why'd we let it go  
        Down on the avenue  
    You can forget your name  
Paint pretty pictures, false and true  
    Picture what we've become  
        Running is all we do  
        Color our love  
        Black and blue  
        Black and blue  
Looks like a storm tonight  
Look like a storm tonight  
    A storm is overdue  
    A storm is overdue  
        Color our love  
        Color our love  
        Black and blue  
        Black and blue
