Night Train

Tickley Feather

Out of the night burning with light
Train shining black, I won't look back, life is running
Hoping some day someone will say
I got it made, pull up the shade, let the sun in
Down on the night train, I feel the starlight steal away
Use up a lifetime looking for the break of day
Border patrol looking through me
The towns without names all look the same, I hear crying
Paris to Spain, countries in pain
Caught up in flight, feeling the sight, Europe dying
Down on the night train, feel the starlight steal away
Use up a lifetime looking for the break of day
Rolling on, hear the wheels singing
Fever keeps coming on so strong
My ticket paid, trying to fade, I hope I get there

Not just somewhere I was leaving
Out in the dark all the wolves bark
But I folds my arms try to keep warm by believing
Down on the night train, I feel the starlight steal away
Use up a lifetime looking for the break of day
Hard rain following on, cold wheels moving on
Everybody they're so 'lone down on the night train
Hard rain following on, cold wheels moving on
Everybody they're so 'lone down on the night train
Night train, night train
Hard rain following on, cold wheels moving on
Everybody they're so 'lone down on the night train
Hard rain following on, cold wheels moving on
Everybody oh, so 'lone down on the night train
Night train, night train, night train, night train
